PROFESSIONAL SUMMARY

AI Automation Engineer and Full-Stack Developer with 2+ years of experience building AI-enabled web applications, CRM automations, API integrations, and internal operations tools for international clients. Strong hands-on background in TypeScript, Next.js, React, Node.js, Python, Supabase/PostgreSQL, and LLM integrations across OpenAI, Claude, and Gemini. Proven ability to automate multi-system workflows across GoHighLevel, SimPro, Zapier, n8n, Slack, and Google Workspace, including systems that save 25+ hours per week in administrative work.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, PHP, SQL, HTML/CSS

Frontend: React, Next.js App Router, Vite, Tailwind CSS v4, shadcn/ui, responsive web design

Backend & APIs: Node.js, Express, REST APIs, webhooks, bearer-token authentication, rate limiting, retry/backoff logic, health endpoints, structured errors

AI & LLM: OpenAI API, Anthropic Claude API, Google Gemini, AI agents, prompt engineering, structured outputs, Zod validation, vision/text workflows, AI parsing

Automation & CRM: GoHighLevel, Conversation AI, n8n, Make, Zapier, SimPro, Slack, Google Workspace, automated email/SMS/WhatsApp workflows

Data, Cloud & QA: PostgreSQL, Supabase, MySQL, SQLite, Vercel, Railway, Docker, Git/GitHub, Vitest, Playwright, CI/CD, debugging, technical support

PROFESSIONAL EXPERIENCE

AVEBA DIGITAL — Philippines (Remote)

GHL AI Tech Specialist — Jul 2026 - Present

- Support and optimize GoHighLevel CRM systems across multiple client accounts, troubleshooting workflow automations, pipelines, calendars, custom fields, lead routing, notifications, and opportunity lifecycle issues.
- Build, repair, and QA production automations for call dispositions, appointment status changes, post-consult follow-ups, task assignment, and lead handoffs, validating fixes through workflow history and live test records.
- Integrate and troubleshoot AI/voice and external-system flows, including Retell AI-to-GoHighLevel automations, webhooks, forms, and CRM field mappings to reduce lead leakage and data inconsistencies.
- Translate client support tickets into root-cause analysis, scoped fixes, QA verification, and clear technical handoff updates for internal teams and stakeholders.

STERK SYSTEMS — Netherlands (Remote)

Web Developer (Part-time) — Jun 2026 - Present

- Design and develop high-converting, responsive websites for local service companies across the Netherlands using Next.js, React, and Tailwind CSS.
- Implement custom UI/UX optimizations, including targeted hero section layout adjustments and localized service imagery integration, to enhance user engagement.
- Embed interactive elements such as Google Maps for local SEO and CRM-connected booking forms to streamline client intake and project scheduling.

THE FAMILY ROOFING COMPANY — Leeds, UK

AI Automation Developer (Part-time, Remote) — Mar 2026 - Jun 2026

- Build and maintain 5+ production GoHighLevel workflows and API integrations that automate lead follow-up, appointment triggers, invoice reminders, and customer communications.
- Connect GoHighLevel, SimPro, Zapier, WhatsApp, SurveyMonkey, SMS, and email channels into reliable operations workflows, reducing manual administrative work by 25+ hours per week.
- Develop and optimize 10+ landing pages, marketing funnels, booking calendars, forms, live chat assets, and QR tracking links to support lead capture and conversion.
- Test webhooks, monitor live workflow execution, troubleshoot integration failures, and document 5 core system processes for internal handoff and continuity.

FREELANCE/REMOTE

Full-Stack Software Developer — 2024 - Present

- Deliver production AI-enabled web apps and internal tools for international clients using TypeScript, Next.js, React, Node.js, Supabase, and PostgreSQL.
- Integrate OpenAI, Claude, and Gemini for image analysis, structured data extraction, content generation, and operations decision support, while automating cross-platform flows through webhooks, n8n, Make, and Zapier.
- Own end-to-end delivery from discovery and architecture through reliability controls, Vitest/Playwright testing, and deployment to Vercel/Railway.

XURPAS INC. Makati, Philippines
Software Developer & QA Intern - ERPNext & Frappe Framework Mar 2025 - Jun 2025

- Supported internal HRIS/ERP development using Frappe Framework, Python, JavaScript, and Jinja templates.
- Built dynamic form logic, frontend scripts, server-side validation, and custom print formats to improve HR data capture accuracy and usability.
- Partnered with senior engineers and QA teams to translate requirements into features, troubleshoot bugs, and prepare modules for production release.

FEATURED PROJECTS

JobPilot - AI Job-Hunting Assistant | *Next.js 16, TypeScript, GPT-4o, Browserbase, InsForge*

- Built a full-stack AI job-search platform with Next.js 16 and TypeScript, integrating the Adzuna API to discover live listings and GPT-4o to score each job 0-100 against the user's profile with explainable match reasoning.
- Engineered a company-research agent using Browserbase + Stagehand to autonomously browse a company's public pages and synthesize a structured interview-prep dossier with GPT-4o, with deterministic fallbacks so it never fails or hallucinates facts.
- Implemented AI resume parsing and PDF generation (GPT-4o + @react-pdf/renderer) and a PostHog-powered analytics dashboard with real-time stats and charts.
- Designed a layered architecture on InsForge (Postgres) with OAuth auth and Row-Level Security, enforcing strict boundaries between agent logic, server actions, and UI.

Echo AI - Voice AI Sales Coach Agent | *Vapi, WebRTC, OpenAI API, Node.js*

- Developed a real-time Voice AI sales coach that runs mock sales calls and helps representatives practice pitch delivery, objection handling, and closing workflows.
- Built adaptive coaching personas and performance prompts for role-play scenarios aligned with high-conversion sales conversations.

Quote Flow AI - Logistics Operations Console | *Next.js, TypeScript, Supabase, OpenAI, Vitest*

- Built logistics ops console for customer intake, AI-assisted shipment parsing, rule-based quote generation, and Slack-based approval workflows.
- Designed finite-state order workflow and deterministic mock database fallback to keep demos fully runnable; achieved 32 passing Vitest tests and Playwright visual captures across critical UI states.

RoofPost AI - Mobile Social Planner App | *React, Vite, Tailwind CSS v4, Express, Claude Vision, Railway*

- Built mobile-first app that analyzes uploaded roofing photos with Claude Vision and generates localized British English social captions.
- Integrated GoHighLevel Social Planner API scheduling, reducing a 15-minute content workflow to under 60 seconds; added bearer-token validation, per-IP rate limiting, and /api/health monitoring.

Marketing Asset Generator - Content Repurposer | *Next.js, OpenAI API, Zod, Tailwind CSS v4*

- Built content repurposing app that converts long-form text into platform-ready formats for LinkedIn, X, TikTok, Instagram, and Facebook using shared Zod schemas for typed API responses.

EDUCATION

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES Batangas, Philippines
Bachelor of Science in Information Technology, Magna Cum Laude 2025

AWARDS

Agora Voice AI Hackathon (Manila) - 2nd Runner-Up 2026

- Built and pitched a real-time AI Conversation Arena prototype using Agora ConvoAI, TRAE IDE, and AWS infrastructure out of 27 competing professional and student teams.

PUP Hackathon (UtHack ang Puhunan) - Top 10 Finalist 2024

- Contributed to feature architecture research and rapid product development under strict competitive time constraints.
